

Adding a new topic

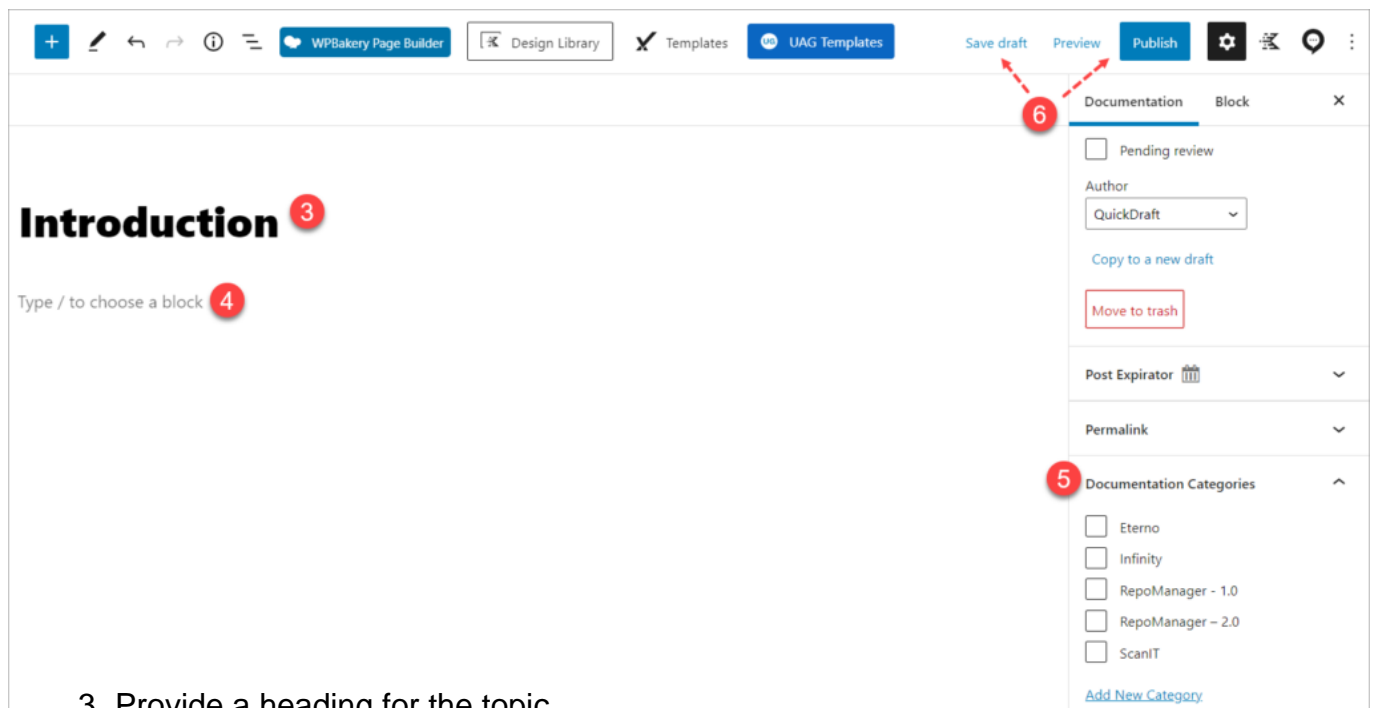

Adding a new topic in Infinity is very easy.

To add a new topic:

1. Login to the Infinity platform with your login credentials.
2. Go to **Documentation > Add Documentation**.

A blank topic opens in Edit mode.

The screenshot shows the edit mode interface for a new topic. The top navigation bar includes buttons for 'Save draft', 'Preview', and 'Publish'. The main content area displays the heading 'Introduction' and a text input field. The right sidebar contains various settings, including 'Documentation Categories' with a list of categories: Eterno, Infinity, RepoManager - 1.0, RepoManager - 2.0, and ScanIT. The 'Add New Category' link is visible at the bottom of the sidebar.

3. Provide a heading for the topic.

-
4. Add the topic contents using the [Block Editor](#).
 5. Select a Documentation Category. See [Creating a New Category](#).

Infinity requires you to have a category even if you are adding documentation only for a single product. Infinity uses categories to group and display topics on the documentation site.

6. Click **Save draft** to update and publish the topic later, or click **Finish** to publish the topic immediately.
