1. Click the step 1
2. Click the step 2
- 3.

Install on Linux/Unit

1. After checking that your system meets the requirements, install the software according to the instructions located at: http://ez.no/doc/ez_publish/technical_manual/4_0/installation/normal_installation/installing_ez_publish_on_a_linux_unix_based_system
2. In the first step, you will create a database for eZ Publish. Next, you will download, unpack and install the eZ Publish distribution. When you reach the step that instructs you to start the Setup Wizard, proceed to the next section of this document.
